- ✓ Rattray, J., Johnston, M., & Wildsmith, J. A. W. (2004). The intensive care experience: development of the ICE questionnaire. *Journal of advanced nursing*, 47(1), 64-73.

Instructions

- ✓ 26 items, 4 factors (Item No. 1~4 = Recall of experiences, 5~9= Satisfaction with care, 10, 19~26 = Frightening experiences, 11~18= Awareness of surroundings).
- ✓ Each item is measured on a 5-point Likert scale. Eleven items (1-11) are responded to regarding agreement (1 = strongly agree to 5 = strongly disagree). Items # 6, 10, and 11 are reversed items. The remaining 15 items (12-26) are responded to with regard to frequency (1 = never to 5 = always).
- ✓ Scores are calculated for each subscale, not for their sum of them, according to the original tool scoring method.

**Korean version of the Intensive Care Experience (K-ICE)
(English version)**

The questions below are questions about your feelings and memories of your ICU experience. In each question, write a "V" where it describes your ICU experience.

1: Strongly agree 2: Agree 3: Moderately 4: Disagree 5: Strongly disagree

No.	Items	1	2	3	4	5
1	Most of my memories of intensive care are blurred.	1	2	3	4	5
2	I wish I remembered more about it.	1	2	3	4	5
3	I seemed to sleep too much.	1	2	3	4	5
4	I never knew whether it was day or night.	1	2	3	4	5
5	My care could have been better.	1	2	3	4	5
6*	I thought my care was as good as it could have been.	1	2	3	4	5
7	I was constantly disturbed.	1	2	3	4	5
8	It was always too noisy.	1	2	3	4	5
9	I was treated impersonally.	1	2	3	4	5
10*	I thought I would die.	1	2	3	4	5
11*	I was able to let people know what I wanted.	1	2	3	4	5

* reversed items
